Figure 1:

Master Thesis

How investors' fear and uncertainty can be used to predict the future short-term movement of cryptocurrencies prices?

Using sentiment and machine learning

SADURNI Thomas

Master of Science - Banking and International Finance
2021-2022

Abstract

This document presents the basic concepts of typesetting in a form usable by non-specialists. It is aimed at those who find themselves (willingly or unwillingly) asked to undertake work previously sent out to a professional printer, and who are concerned that the quality of work (and thus their corporate æsthetic) does not suffer.
